

Chaiwan Wisedrat

FULL-STACK DEVELOPER

Full-stack developer and Computer Science student with hands-on experience across the entire stack – from building responsive front-end interfaces with Flutter to designing and implementing back-end services, APIs, and databases. Comfortable owning a feature end-to-end, from UI/UX design through deployment. Seeking a full-stack development role where I can apply my skills in a real-world team environment and continue growing as an engineer.

EDUCATION

Maharakham University 2023 - Present
Faculty of Informatics

- Major : Computer Science
- GPAX : 2.83

TECHNICAL SKILLS

Programming Languages | Java, PHP, JavaScript, Python, C++, Dart, C#

Fronted | Angular, CSS, Tailwind CSS, Flutter

Backend | Node.js, Express.js, ASP.NET

Database | MongoDB, Firebase, MySQL

Tools | Github, Docker, Postman, Figma

Operation System | Ubuntu, Kali-linux

LANGUAGES

Thai Native
English Intermediate CEFR B1

CERTIFICATS

HACK THE SCAMMER CTF #Team Mooh Mooh
#TOP 103 Team

NCSA CTF Thailand Tournament :

PROJECTS EXPERIENCE

MyVocab Application – English Vocabulary Learning App |

Flutter · Dart · Firebase · Kotlin

- Designed and developed a cross-platform mobile app that helps users build English vocabulary through interactive quizzes and flashcards
- Leveraged Flutter and Dart to deliver a smooth, responsive experience across both Android and iOS
- Integrated Firebase Authentication and Firestore for secure user login and real-time data storage
- Crafted a clean, intuitive UI/UX to encourage consistent daily practice
- Added a progress-tracking system that lets users monitor learning streaks and quiz scores over time

Delivery Application – RAPDELI : Delivery Application | Flutter ·

Dart · Firebase · JavaScript

- Designed and developed a delivery application connecting Users and Riders, enabling seamless ordering and delivery management
- Built two separate interfaces: a User app for placing orders and tracking deliveries, and a Rider app for accepting and managing delivery tasks
- Implemented real-time order tracking and status updates using Firebase Firestore
- Integrated user and rider authentication with Firebase Authentication
- Designed an intuitive UI/UX to simplify the ordering process for users and task management for riders
- Developed features for order history, delivery status, and notifications to enhance user experience

WebCoinGame | Node.js · TypeScript · Firebase · Javascript · Css

- Designed and developed a full-stack web application for purchasing in-game currency/coins, allowing users to browse available packages and complete top-up transactions online
- Built the back-end using Node.js and Express.js with TypeScript to handle order processing, transaction logic, and API endpoints
- Integrated Firebase Authentication to manage secure user login, registration, and session handling
- Used Firebase Firestore as a real-time database to store user profiles, transaction history, and coin balance records
- Developed an admin panel for managing coin packages, pricing, and monitoring user transactions
- Implemented transaction status tracking (pending, success, failed) to ensure accurate and reliable coin delivery
- Built a responsive and user-friendly front-end using JavaScript for a smooth purchasing experience
